

# Smartphones are

## Important

I affirm that Smartphones are important in our daily life. The reason is everything we do is related to Smart phones. Smartphones are creating easiness in our lives. Smartphones have a positive effect on our lives. They changed the way of living.

### Importance of Smartphones in our daily lives

Smartphones are becoming the necessary part of our lives. Smartphones have both good and bad usage. It just depends upon its user. Keeping in mind, its positive usage They have literally changed the way we live. Smartphones are not just limited for communication; smartphones are replacing many things and that's why its importance is increasing day by day.

### Easy Way of Connection

Smartphones are the easiest way of communicating other peoples. Through smart phone you can talk to a person sitting miles away from and even you can see him through video call. You can do your business by sitting in other country. You can deal with foreign clients. Everything is just a minute away from you.

### Help in getting Education

You can read books on your smartphone instead of buying books. You can attend live classes in different countries. During Covid 19, schools are shifted to online systems and children attend their classes virtually through Smartphone.

### Helpful in Emergency

Smartphone is very handy, in case of any Emergency like accident or anything with the help of Smartphone you can call anyone. It also

provides you safety in terms of Security. In case of any serious situation, you can call police.

### Entertainment

Smartphones are not just for the purpose of calling or messaging, it provides you a source of entertainment. You can watch Talk shows, Movies on your phones. When you are getting bore you can play games. It provides you refreshment from work load.

### Applications in Smartphones

Smartphone Applications extend the usage of phones. If you don't have a laptop and you have to use excel or word, now you can use it on your phone. Maps Applications are guiding you to reach to your friend. Other Applications like Alarm Clocks, Calculators, Converters, all that.

Smartphones are becoming the basic necessity of Life.
